1. Introduction

Future market growth is expected in sensing applications of IoT and also in the energy harvesting applications which are important for becoming carbon neutral. Targeting these markets, we have released a low power op-amp TC75S102F, and developed an Application Circuit using this Low Power Consumption Op-Amp TC75S102F as a reference design (hereafter referred to as "this design").

This Reference Guide describes the specification and operation procedure of this design. This design uses low power op-amp(s) <u>TC75S102F</u>, Schottky barrier diodes <u>1SS389</u> to prevent reverse current flow to the power supply terminal, a Zener diode <u>CEZ5V6</u> to protect from overvoltage, a MOSFET <u>SSM3K15AFU</u> for driving LED, and a low dropout regulator (LDO) <u>TCR3UF20A</u> as a power supply IC.

2. Specifications and Appearance

2.1 Specifications

Table 2.1 lists the main specifications of various designs of this application circuit.

Design Name	Onboard Sensor	Charging Method	Operation
A1	Light sensor (photodiode)	USB Type-C [®]	LED turns on after sensor detection
A2			LED blinking interval changes according to the sensor value
A3		USB Type-C [®] Solar cell	
B1	Pressure sensor (Polymer thick film)	USB Type-C [®]	LED turns on after sensor detection
B2			LED blinking interval changes according to the sensor value
В3		USB Type-C [®] Solar cell	
C1	Sound sensor (MEMS microphone)	USB Type-C [®]	LED turns on after sensor detection
C2			LED turns on after sensor detection (equipped with Op-Amp offset cancelling DC servo function)
C3		USB Type-C [®] Solar cell

4. Operation

4.1 Operation Method

The standard procedure for starting this circuit is as follows.

4.1.1. Pre-charge

 \cdot Connect a USB charger to USB Type-C[®] connector (CN1) to charge the electric double layer capacitor.

(about 30 seconds).

•For the designs with solar cell (design A3, B3, C3), irradiate the solar cell with sunlight, etc. to charge the electric double layer capacitor.

(for approximately 2 minutes on a sunny day).

It can also be charged using USB $\mathsf{Type}\text{-}\mathsf{C}^{\texttt{®}}$ connector.

•After that, the USB charger can be disconnected, and the board can be used standalone.

Fig. 4.1 Front Side of the Board (Example of Design A2)

Fig. 4.2 Back Side of the Board (Example of Solar Cell Mounted Board)

4.1.2. For Design A1, A2, A3

Light sensor (PD1)

Fig. 4.3 Light Sensor Board (Example)

•Design A1

The LED turns on when the light sensor detects the light.

•Design A2, A3

The LED blinking interval changes according to the brightness of light detected by the light sensor.

(If the brightness increases, the blinking interval becomes shorter).

4.1.3. For Design B1, B2, B3

TOSHIBA

Pressure Sensor (S1)

Fig. 4.4 Pressure Sensor Board (Example)

•Design B1

The LED turns on when pressure is applied to the pressure sensor.

•Design B2, Design B3

The LED blinking interval changes according to the pressure applied on the sensor. (if the pressure increases the blinking interval decreases.)

4.1.4. For Design C1, C2, C3

Sound Sensor (M1)

Fig. 4.5 Sound Sensor Board (Example)

The LED turns on when the sound sensor detects the sound.

4.2 External Connector Specifications

The external connector specifications of this circuit are as follows.

Table 4.1 Input Connector Specifications

Input Port	Input Voltage	
CN1	5 V	
(USB Type-C [®])		

5. Precautions

•Be careful not to touch any component of the board other than the sensor, as it may get destroyed by static electricity.

- · Do not apply excessive voltage to USB Type-C $^{\ensuremath{\mathbb{R}}}$ connector.
- •Be careful not to short-circuit the pins of the electric double layer capacitor.
- •When disposing of this board, follow the instructions from your local authorities.

Terms of Use

This terms of use is made between Toshiba Electronic Devices and Storage Corporation ("We") and customers who use documents and data that are consulted to design electronics applications on which our semiconductor devices are mounted ("this Reference Design"). Customers shall comply with this terms of use. Please note that it is assumed that customers agree to any and all this terms of use if customers download this Reference Design. We may, at its sole and exclusive discretion, change, alter, modify, add, and/or remove any part of this terms of use at any time without any prior notice. We may terminate this terms of use at any time and for any reason. Upon termination of this terms of use, customers shall destroy this Reference Design. In the event of any breach thereof by customers, customers shall destroy this Reference Design, and furnish us a written confirmation to prove such destruction.

1. Restrictions on usage

1. This Reference Design is provided solely as reference data for designing electronics applications. Customers shall not use this Reference Design for any other purpose, including without limitation, verification of reliability.

2. This Reference Design is for customer's own use and not for sale, lease or other transfer.

3. Customers shall not use this Reference Design for evaluation in high or low temperature, high humidity, or high electromagnetic environments.

4. This Reference Design shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable laws or regulations.

2. Limitations

1. We reserve the right to make changes to this Reference Design without notice.

2. This Reference Design should be treated as a reference only. We are not responsible for any incorrect or incomplete data and information.

3. Semiconductor devices can malfunction or fail. When designing electronics applications by referring to this Reference Design, customers are responsible for complying with safety standards and for providing adequate designs and safeguards for their hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of semiconductor devices could cause loss of human life, bodily injury or damage to property, including data loss or corruption. Customers must also refer to and comply with the latest versions of all relevant our information, including without limitation, specifications, data sheets and application notes for semiconductor devices, as well as the precautions and conditions set forth in the "Semiconductor Reliability Handbook".

4. When designing electronics applications by referring to this Reference Design, customers must evaluate the whole system adequately. Customers are solely responsible for all aspects of their own product design or applications. WE ASSUME NO LIABILITY FOR CUSTOMERS' PRODUCT DESIGN OR APPLICATIONS.

5. No responsibility is assumed by us for any infringement of patents or any other intellectual property rights of third parties that may result from the use of this Reference Design. No license to any intellectual property right is granted by this terms of use, whether express or implied, by estoppel or otherwise.

6. THIS REFERENCE DESIGN IS PROVIDED "AS IS". WE (a) ASSUME NO LIABILITY WHATSOEVER, INCLUDING WITHOUT LIMITATION, INDIRECT, CONSEQUENTIAL, SPECIAL, OR INCIDENTAL DAMAGES OR LOSS, INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF OPPORTUNITIES, BUSINESS INTERRUPTION AND LOSS OF DATA, AND (b) DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES AND CONDITIONS RELATED TO THIS REFERENCE DESIGN, INCLUDING WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY OF INFORMATION, OR NONINFRINGEMENT.

3. Export Control

Customers shall not use or otherwise make available this Reference Design for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). This Reference Design may be controlled under the applicable export laws and regulations including, without limitation, the Japanese Foreign Exchange and Foreign Trade Law and the U.S. Export Administration Regulations. Export and re-export of this Reference Design are strictly prohibited except in compliance with all applicable export laws and regulations.

4. Governing Laws

This terms of use shall be governed and construed by laws of Japan.
